The Oasis

THE OASIS

A colony survival framework.

A colony ship carrying 5,000 sleeping settlers woke 400 years too late — above the world they left, which died while they slept. Now 4,400 survivors live in a crashed ship on the edge of an alien marsh, surrounded by ruins they don't remember losing.

THE OASIS is for tables that want survival with weight: hard choices, real consequences, and a mystery that does not resolve neatly. It is built for one-shots and campaigns alike, and designed to be picked up fast.

THE SETTING

The colony ship **Oasis** carried 5,000 people in cryosleep on a planned 10-year voyage to a new world. A cult sabotaged the Korenfeld Drive mid-transit. A backup drive spent **400 years** resolving the ship back to stable space.

4,400 colonists survived. The ship crashed on the surface of **Rimaer-Prime** — the world they left. No transmissions. No government. Orbit decaying. They had to land.

Four centuries is enough time for civilization to collapse, ruins to go feral, and new cultures to form. It is also short enough that scavengers still fight over wreckage, vaults still open, and some survivors remember the world before.

TONE

Tragic science fiction. Colony survival. Eldritch horror rooted in human consequence, not the supernatural. Inspired by **RimWorld**, **The Thing**, **Annihilation**, and **Roadside Picnic**.

There is no god. The Cult invented one and that act of invention killed everyone. No villain survives to overthrow. No justice to extract. Only the long, slow, inhuman aftermath — and 4,400 people who need to eat tomorrow.

CHARACTER CREATION

You are an **Oasis colonist** who just woke from cryosleep. You had a career, relationships, and a life on old Rimaer-Prime before you boarded. All of that is 400 years gone.

- 1 Choose **2 Proficiencies** from the crew manifest — your jobs and roles on the Oasis.
- 2 Choose **2 Specialties** that hang off your proficiencies for +2 when they clearly apply.
- 3 Choose **2 Traits** — permanent personality features that define how you act under pressure.
- 4 Receive your **Pantheon Standard Kit**. Assume any tools appropriate to your proficiencies.
- 5 Define **1 relationship** with another character — someone from before cryo or since waking.
- 6 Choose **1 Play** — a narrative tool that gives you permission to do something creative or dramatic.

IF YOU'D HAVE IT

Colonists don't inventory every item. If something fits your proficiency and your life on the Oasis, you have it. If it's rare, dangerous, or colony-critical — ask the Storyteller.

Rimaer: Plays & Traits

RIMAER: PLAYS & TRAITS

PLAYS

Choose **1 Play** at character creation. Plays are not bonuses — they are **permissions** to do something creative, dramatic, or unexpected. Per-scene plays reset each scene. Per-session plays reset each session.

PER-SCENE

READ BETWEEN THE LINES

Study a person, document, or scene. Ask the Storyteller one honest question.

GHOST MOVE

Retroactively declare you moved to a different position before the current moment.

DESPERATE IMPROVISATION

Solve a problem using only what's in the scene right now. If the table finds it genuinely creative, it works — but the Storyteller names the cost.

JURY-RIG THE SCENE

Establish one detail about the current location that hasn't been mentioned yet.

MAKE A SCENE

Draw every eye to yourself for one beat. You choose what happens in that window.

BRACE FOR IMPACT

Danger hits, but you choose how it lands — and you're still standing.

ECHO

When someone else fails, turn their bad moment into your opening.

CONFESSIONAL

Reveal something true and hidden. Vulnerability becomes leverage.

PER-SESSION

I KNOW A GUY

Declare you know someone relevant. Describe the connection. They exist now.

INVOKE THE PAST

Introduce a fact, preparation, or connection from before the Oasis. The fiction adjusts.

PLAN B

When a plan falls apart, reveal the backup you prepared — but the Storyteller says what's missing.

SACRIFICE PLAY

Destroy or give up something that matters to guarantee one specific outcome.

DEAD MAN'S GAMBIT

Do something reckless and unexpected. If it's genuinely creative, complications don't apply.

TRAITS (CHOOSE 2)

Traits define how your character acts under pressure. They are narrative anchors — and can become the basis for a Burden when the fiction demands it.

PSYCHOLOGICAL	PHYSICAL	SOCIAL
Volatile	Wimp	Abrasive
Pessimist	Trigger-Happy	Stubborn
Optimist	Careful Shooter	Kind
Neurotic	Brawler	Loud
Hyper-Empathetic	Sickly	Creepy Presence
Claustrophobic	Klutz	Absent-Minded
